

MAKE ME BLUSH

JELLY BLUSH
008(2).Q2

OVERVIEW

This blush will quickly become a staple in your makeup routine thanks to its innovative texture and intense pigmentation. Made with two effective natural texturizers SAFIC' CARE T CK 2 and SAFIC' CARE T XCG, its jelly formula provides a unique sensation. Its vibrant hue is achieved with Azorubin 85% E122, while its fruity fragrance adds a delicate touch thanks to Cherry Malachite. To apply it, simply activate this formula with a bit of water to transform it into an ink-like consistency, or use a water-based primer beforehand.

Phase	Trade Name	Supplier	European I.N.C.I. Name	Function	%
A	Demineralized water	/	Aqua	/	86,50

PROCESS

PHASE A : Heat water and stop before boiling. Place under stirring.

PHASE B : Pre-mix then add it to phase A and heat at 75°C for 15 minutes until homogeneous.

PHASE C : Add to phase AB and stir until homogeneous.

PHASE D : Pre-mix then add it to phase ABC and stir until homogeneous.

Complement with water, homogenize then adjust pH to 5,5-6,5.

At 75°C pour with a syringe into sticks then place in the fridge for 30 minutes.

PROPERTIES

APPEARANCE : Jelly red stick.

VISCOSITY : N/A.

pH : N/A.
