OVERVIEW

This malleable texture is created through a combination of powders and SolAmaze™ Natural. Natrasorb® Bath can absorb a significant amount of oil which is released once in contact with water. Amaze™ Nordic Barley delivers a pleasant sensory to the formula, negating any stickiness. Elfan® AT 84 is a sulphate-free surfactant which, in combination with Sabowax PG6L MB, allows the product to emulsify with water. Thanks to its unique texture, it's a perfect travel designed anhydrous product.
