

PINK CUSHION

NOURISHING BODY BUTTER

008.X40

BODY

GP2024INCOS

OVERVIEW

This rich baby-pink body cream is a nourishing formula with a thick texture allowed by Plantasens® Emulsifier HP30 combined with consistency agents such as Shea Butter and Jojoba Esters. It presents a richness in Omega 3 brought by the Inca Inchi® WO Organic Lipactive which enables to regenerate the epidermis, soften the skin as well as preserve its lipid balance. This cream also provides longlasting hydration and helps prevent skin fluctuation due to seasonal changes through other actives such as PolyFructol Plus and Fermentage Aloevera. It is an easily spreadable emulsion leaving a soft and smooth afterfeel to the skin, with high moisturization.

Phase	Trade Name	Supplier	European I.N.C.I. Name	Function	%
A	Demineralized water	/	Aqua	/	59,60

OVERVIEW

This rich baby-pink body cream is a nourishing formula with a thick texture allowed by Plantasens® Emulsifier HP30 combined with consistency agents such as Shea Butter and Jojoba Esters. It presents a richness in Omega 3 brought by the Inca Inchi® WO Organic Lipactive which enables to regenerate the epidermis, soften the skin as well as preserve its lipid balance. This cream also provides longlasting hydration and helps prevent skin fluctuation due to seasonal changes through other actives such as PolyFructol Plus and Fermentage Aloevera. It is an easily spreadable emulsion leaving a soft and smooth afterfeel to the skin, with high moisturization.

PROCESS

PHASE A : Heat up to 75°C under stirring.

PHASE B : Pre-mix then add it to phase A and stir for 15 minutes at 75°C until homogeneous.

PHASE C : Heat up to 75°C under stirring until homogeneous.

PHASE D : Add to phase C and homogenize.

Add phase CD to phase AB and stir until homogeneous.

Allow to cool down to 40°C.

PHASE E : Add slowly to phase ABCD and stir until homogeneous.

Cool down to room temperature.

PHASE F : Pre-mix then add it to phase ABCDE and homogenize.

PHASE G : Add to the formula, complement with water and homogenize.

Adjust pH to 5,5-6,5.

PROPERTIES

APPEARANCE : Thick pink cream.

VISCOSITY : 14480 cPs
(Brookfield RVDV-I+, 5 rpm, 1 min, spindle 5).

pH : 5,5 - 6,5.
